Project (Solo)

Himmel *Elysia.js, Next.js, MongoDB, AWS EC2, AWS S3, TypeScript*   github.com/meowlet/elysia-himmel
Web Manga Platform

Tsukinari *Kotlin, Jetpack Compose, Firebase, Material Design*   github.com/meowlet/tsukinari
Android Manga Reading Platform (Published on Google Play)

Discord TTS Bot *JavaScript, Bun.js, Discord.js, Redis, AWS EC2*   top.gg/bot/909654785156853800
Officially Verified Discord Bot

Payment Gateway Service *TypeScript, Bun.js, Elysia.js*   github.com/meowlet/payment-gateway-service
A lightweight payment gateway service that handles multiple payment providers seamlessly with high security standards

MoMo Payment Processor *TypeScript, Bun.js, Elysia.js*   github.com/meowlet/momo-payment-processor
A specialized microservice handling MoMo e-wallet payment results processing

Education

HCMC University of Foreign Languages and Information Technology   District 10, HCM City
Bachelor Software Engineering *GPA: 3.6+*   Sep 2022 - Sep 2026

Technical Skills

Programming Languages:	TypeScript, JavaScript, Kotlin, Java, C#
Backend Development:	Node.js, Bun.js, Elysia.js, Express.js, RESTful APIs
Mobile Development:	Android, Kotlin, Jetpack Compose
Frontend Development:	React.js, Next.js, Astro, HTML, CSS
Databases:	MongoDB, MSSQL, Redis
Cloud & DevOps:	AWS EC2, AWS S3, Cloudflare, Linux (Arch), Git, Docker
Development Tools:	Vim/Neovim, IntelliJ IDEA, Android Studio, Visual Studio Code
Social Skills:	Mentoring, Time Management, Problem Solving, Effective Communication
Side Skills:	Music, Instrument (Piano, Guitar), Book Cover Design

Experience

University Projects   Ho Chi Minh City, Vietnam
Full Stack Developer   Oct 2022 - Present

- Developed The Booker - an A-grade e-commerce platform for books using modern web stack (Astro, Tailwind, Supabase)
- Created a mobile fiction reading platform with Kotlin and Jetpack Compose which is published on Google Play, earning A+ grade
- Architected a family tree management system with RESTful API backend
- Built a commercial-grade reading platform with premium features and payment integration (Bun, Elysia.js)
- Integrated multiple payment gateways (MoMo, VNPay) for premium subscription handling

Self-taught Developer   Dak Lak Province, Vietnam
Discord Bot Developer   Jan 2021 - Dec 2021

- Achieved Discord verification status within first year of development
- Built and maintained a verified Discord bot serving 2000+ servers
- Implemented audio streaming features using FFmpeg and Discord.js

Linux & Development Tools Enthusiast   Ho Chi Minh City, Vietnam
Linux User   Sep 2022 - Present

- Self-explored various Linux distributions, ultimately choosing Arch Linux for its deep learning potential
- Mastered Linux system internals through manual Arch installation and configuration
- Adopted Vim/Neovim as primary development environment, customizing for optimal workflow

Early Tech Explorer   Dak Lak Province, Vietnam
Self-taught Developer   Sep 2018 - Sep 2018

- Built first website using pure HTML/CSS
